4) COMMITTEE REPORTS -

Water Committee - Vice President Schultz ~

- **Continuing discussion regarding the water tank project** – The Contractors are working on the piping and have all but one part that was due to arrive yesterday. They hope to start coating the outside June 1st. They are planning to do the majority of coating by roller instead of spray to limit issues with overspray. Waterboards is requiring new tanks to have a series of tests after filling and can take up to 2 weeks after the tests to approve putting the tank online. One of the tests has to be done over 5 days. They may have to drain and then refill some of the water because having it sit stagnant for 2 weeks isn't good.

Continuing discussion on Meter replacement project – Alejandra hasn't asked for any more items from Liam but she is waiting on us to provide a current CIP and 5 year budget. I have those ready with the exception of new costs from AWA.

- **Continuing discussion on Water Analysis** – A valve in the Master meter 3 area will be opened to increase hydrant pressure but will impact this area's data for the water analysis. It was agreed to continue tracking the water analysis.
- **Infrastructure Needs** – Liam is working on a scope of work to finish specifications and will provide a quote, along with a quote from the Environmentalists. These items will go to RCAC for the Planning Grant. We will include the full \$15 Million project in the planning portion.
- **Water line extension** – Lori will contact Supervisor Frank Axe to see if he can assist in a meeting with County Transportation to limit the road re-paving requirement and seek Cal Fire funding.
